SUMMARY

Passionate web developer with hands-on experience in building robust, scalable, and user-focused applications. Skilled in both frontend and backend technologies, with a strong foundation in modern frameworks. Eager to contribute to impactful and innovative software projects.

EDUCATION

Master of Computer Applications   **Jul 2024 - Present**

Compucom Institute of Technology & Management, Jaipur
- GPA: Awaiting
- Coursework: Advanced Data Structures, Cloud Computing, Machine Learning, Web Technologies, Software Engineering

Bachelor of Computer Applications   **Jul 2021 - Jun 2024**

University of Engineering and Management, Jaipur
- GPA: 7.6/10
- Coursework: Object-Oriented Programming, Web Development, Database Management Systems

EXPERIENCE

MERN Stack Developer, Aucio Infotech   **Jul 2025 - Present**
- Collaborated on end-to-end development tasks, from UI design to backend integration, ensuring a cohesive and functional product.
- Improved development efficiency by leveraging AI tools for code generation, testing, and debugging.
- Enhanced full-stack development skills through hands-on practice with modern workflows and real project scenarios.

Backend Developer Intern, PearlThoughts   **Jun 2025 - Jul 2025**
- Built and optimized doctor-patient appointment APIs using NestJS, TypeORM, and PostgreSQL, simulating real-world healthcare systems.
- Gained practical experience in team collaboration, Git/GitHub workflows, and project management using GitHub Projects.
- Strengthened backend development skills through hands-on coding, debugging, and system design in a collaborative environment.

Backend Developer Intern, Appinop Technologies   **Jan 2023 - Mar 2023**
- Contributed to the development of backend services using Node.js, with a focus on core application functionalities.
- Applied best practices in backend development, including code organization and testing principles.
- Gained hands-on experience in database management (MongoDB), File management and debugging backend issues to ensure stable application performance.

PROJECTS

Appointment Booking System   **Github Repo ↗**
- Designed and implemented core features such as doctor availability management, appointment booking, rescheduling, and cancellation flows using NestJS.
- Developed role-based authentication (Google OAuth & email/password) for doctors and patients, ensuring secure access and scoped data interactions.
- Collaborated with a team using Git, GitHub, and Kanban-style project tracking (GitHub Projects) to manage tasks and review code.
- Tools Used: NestJS, TypeScript, TypeORM, PostgreSQL, Passport.js, Google OAuth, GitHub Projects, class-validator, class-transformer

NextTube   **Github Repo** ↗
- Developed a YouTube-like web application using Next.js that works with real-time YouTube data, featuring user authentication, video Browse, and a theming system.
- Implemented core functionalities such as user playlists, channel pages, video search, and comment sections for videos.
- Designed a responsive interface with a collapsible sidebar for navigation and integrated various feeds like Trending, Music, and Gaming.
- Tools Used: Next.js, TypeScript, Clerk, Tailwind CSS, Shadcn UI, React Player, Google Cloud Platform (for YouTube Data API v3 & OAuth).

Food-Ordering-App   **Github Repo** ↗
- Developed a full-stack MERN (MongoDB, Express, React, Node.js) food delivery application enabling users to browse restaurants, add items to a cart, and place orders.
- Implemented user authentication, restaurant management, and secure payment integration via Stripe.
- Designed a responsive interface for all devices and incorporated features like light/dark theme switching, and admin dashboards for managing restaurants, menus, and orders.
- Tools Used: React, Node.js, Express.js, MongoDB, TailwindCSS, Stripe API, Cloudinary.

ADDITIONAL INFORMATION

- **Technical Skills:**
  Languages: JavaScript, TypeScript, Python
  Frontend: NextJs, React, HTML, CSS, TailwindCSS, Shadcn UI
  Backend: NestJS, ExpressJS, NodeJS, Bun
  Databases: MongoDB, Mongoose, PostgreSQL, Prisma, Drizzle, TypeORM
  Ai Tools: v0, Cursor, GitHub Copilot
  Tools/Platforms: Git, GitHub, VS Code, Postman, Clerk, BetterAuth, Stripe
- **Languages:** Hindi, English
- **Certifications:**
  Data Science- Application in problem solving
  AWS Academy Machine Learning Foundations
  Software Project Management Training (PMP)
  Introduction to Artificial Intelligence
- **Activities:**
  Ace Hack, Hackathon
  Codesta Coding Competition
